

HOW ICC-ES CERTIFICATION BENEFITS YOU

The International Code Council Evaluation Service is the authority on building code compliance. ICC-ES-certified building products are certified to meet the International Building Code® (IBC) and the International Residential Code® (IRC). Every Perma-Column® and FootingPad® foundation product is ICC-ES certified.

For builders, certification means:

- Streamlined permitting and approval processes
- Building products are code-compliant
- Confidence your building materials perform as expected
- Assuring customers they are making a smart investment

For consumers, certification means:

- Deeper insights into their project's quality
- Greater trust in a builder who uses certified products
- Confidence in their investment
- Peace of mind for all involved

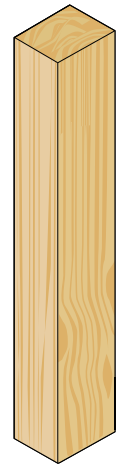

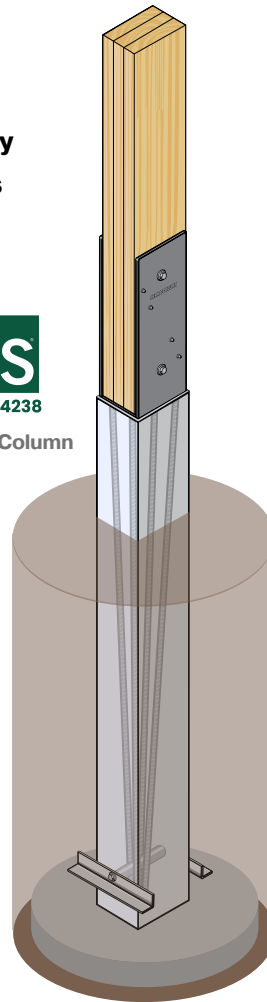

Build with confidence knowing the full line of Perma-Column® and FootingPad® products are ICC-ES certified. In addition, these products are backed by a lifetime warranty, ensuring the enduring quality of your building.

Every Perma-Column® product is ICC-ES certified

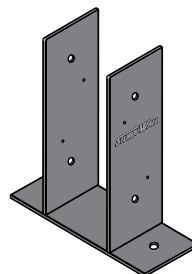

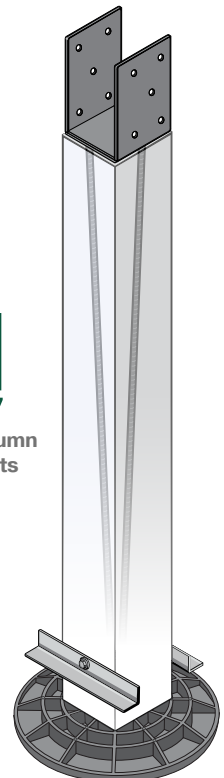

- Perma-Column® precast concrete columns
- Sturdi-Wall® and Sturdi-Wall® Plus brackets
- Perma-Column® deck posts
- FootingPad® composite footers

Meet the demands of a growing market

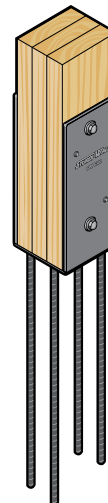

- Customers know wood in the ground will rot
- Perma-Column® products are the permanent solution
- ICC-ES certification assures code compliance
